## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-24 and 26-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al.'240. Walker discloses a computer automated method (figures 1-21) for use by a service establishment (column 1, lines 28-35), the method comprising acquiring a signal (via sensors 140,145) from a device carried by the customer (column 3, lines 49-63) during a visit to the establishment, deriving information which allows for the identification of the customer (column 1, lines 50-55) and using this information to determine previous interactions with the customer and recommending like/similar products (column 9, lines 31-61). Also, Walker discloses the method to include information about customers and their patronage (column 14, lines 7-9) as well as repeat customers (column 14, line 10), which would inherently assist one in assessing and determining quality of service. In reference to the claimed step of offering a product to a customer who had received inadequate service, this is such a common occurrence in the non-automated world that to move this step to the

automated world would be very obvious and an obvious choice of design within the method.

Applicant's arguments with respect to claims 1, 3-24 and 26-41 have been considered but are moot in view of the new ground of rejection.
